

member handbook

Member Handbook

You are a gym member. Your job is simple: join the right gym, scan in, follow your plan, buy what you need, and renew on time.

First 5 Minutes

Step	What to do	Where
1	Sign in or create account	Mobile app or /login
2	Find your gym	/gyms or mobile Home → Find gyms
3	Open gym profile	/g/[username]
4	Choose plan / request access	Gym profile → Join
5	Check in	Mobile Scan tab

Production note: test accounts using 000000 are local/staging only. In production, use the real OTP/SSO flow.

Mobile Screens

Bottom Nav: Home · Scan · Plans · Shop · Profile

Screen	What to verify	Healthy state
 Home /	Membership card, completion ring, renew CTA	Days left and status are readable

Screen	What to verify	Healthy state
 Scan /scan	Camera permission, QR scan, manual code fallback	No auto-permission request on launch
 Attendance result /attendance/[id]	Approved, pending, rejected states	Clear status + next action
 Plans /plans	Workout/diet/habit plan detail	Assigned plan opens cleanly
 Shop /shop	Product cards, cart, checkout, pickup code	Adding to cart does not resize cards weirdly
 Notifications /notifications	Unread, empty state, settings CTA	Copy is readable, no clipped rows
 Membership /membership	History, renewal, payments	Sticky renewal button fits text
 Profile /profile	Phone/email, privacy, language, export/delete	Buttons and labels fit

Web Entry Points

URL	What it does
/gyms	Search public gyms by name/city
/g/[username]	Public gym profile, facilities, plans, trainers
/join/[username]	Join flow with referral/coupon support
/r/[code]	Referral link entry
/checkout/[sessionId]	Payment checkout
/me	Member web account handoff

Core Member Flows

1. Join a gym

Find Gym → Open Profile → Pick Plan → Apply Coupon / Referral → Pay → Active

Special cases:

- **Approval required:** request access first, then wait for owner/admin approval.
- **Invite only:** enter invite/referral code before checkout.
- **Minor member:** guardian consent is required before checkout.

Verify:

- Plan price, duration, discount, and final amount are visible.
- Payment success returns to a clear membership state.
- Failed or unavailable payment shows a friendly retry path.

2. Check in

Scan tab → Point at QR → Result screen

- ✓ Approved: check-in recorded
- ⌚ Pending: desk/owner review needed
- ✗ Rejected: reason + next action

Fallback:

Scan tab → Enter code manually → Submit

Verify:

- QR placeholder/icon is correctly sized.
- Manual code can be copied/pasted.
- Camera-denied state explains how to continue.

3. Follow a plan and track progress

Plans → Open assigned plan → Mark exercise / habit → Save progress

Verify:

- Haptics fire on key toggles.

- Long exercise names do not clip.
- Completion state updates without shrinking cards.

4. Buy from shop

Shop → Add item → Cart → Checkout → Pickup code → Desk verifies pickup

Verify:

- Product card height stays stable after adding to cart.
- Cart total is clear.
- Pickup code is tappable/copyable.

Member Production Smoke Checklist

- ☐ Login works with real production OTP/SSO.
- ☐ Home loads the active membership state.
- ☐ Completion ring is centered and readable.
- ☐ Scan opens permission flow and manual fallback.
- ☐ Plans, Shop, Notifications, Membership, Profile all open.
- ☐ Cart and checkout display the correct amount.
- ☐ Renewal CTA text fits on small phones.
- ☐ Bottom nav is evenly spaced and does not bleed into the safe area.

Good-to-Know Rules

- **The big lime action is usually the next best step.**
- **Your status comes first:** active, expired, pending, rejected, or renewal due.
- **Codes are copyable** wherever the app shows referral, pickup, or attendance codes.
- **Privacy requests** live in Profile and should show export/delete options clearly.
